SUBJECT			
Drilling at Bauer, Tooele Smelter & Richardson's Flats.			
SUMMARY OF COMMUNICATION			
<p>Jeff informed me that the Utah drilling activities had been delayed because the drillers had been unable to get all the drilling materials they needed to complete the wells. Due to this shortage of material, the wells at Bauer have not been finished, and drilling has not started at Tooele and Richardson's Flats. It is therefore unlikely that groundwater samples will be taken at these sites until at least next week, which delays our plans for preparing HRS packages for these sites. Jeff is working on the rest of the documentation for the HRS's, so that the ground water data can be included as soon as it is available.</p> <p>Jeff also had some new information on United Park City mines NPDES permit. It is permit #UT0022403, and it is for the Onterio #2 Drain Tunnel, which flows into Drain Tunnel Creek and the Provo River. The tailings that we investigated, Tailings Pond #2, is in the Weaver River drainage, not the Provo. It does not appear that the NPDES permit is for the tailings we are sampling.</p>			
CONCLUSIONS, ACTION TAKEN OR REQUIRED			
<p>FIT is working with driller to secure drilling supplies.</p> <p>I will research NPDES permit information at EPA</p>
